

Male Survivors Feedback: Key Points (2020 – 2022)

The feedback and counselling outcomes outlined below have been taken from our 'Evaluation of Counselling Service' feedback forms & our 'Wellbeing Surveys' (from 2020 - 2022), which have been completed by male clients after they have received RSVP counselling.

From 2020 to 2022

100%

of male survivors said they were satisfied with the counselling they received at RSVP.

From 2020 to 2022

100%

of male survivors felt that the room and environment in which they received counselling was comfortable.

From 2020 to 2022

100%

of male survivors said that the support they received helped them to understand how sexual violence & abuse affected them.

From 2020 to 2022

100%

of male survivors said that counselling has helped them deal with any problems better in the future.

From 2020 to 2022

100%

of male survivors rated their wellbeing as "good" or "very good" following counselling.

From 2020 to 2022

100%

of male survivors were given a choice about whether they were supported by a male or female counsellor.

From 2020 to 2022

100%

of male survivors said that RSVP responded appropriately to their needs.

From 2020 to 2022

100%

were given information about the types of support & referrals to other agencies.

From 2020 to 2022

100%

felt able to & knew how to give views & feedback which could help to shape & develop RSVP services.
