

Coronavirus & Keeping You Safe in RSVP

What is Coronavirus?

Coronavirus is an illness that affects people's breathing and lungs. It can be spread from person to person by coughing or by touching surfaces. Many people who get Coronavirus will usually only get a little ill, like a regular cold. Many people don't get it at all. Grown-ups with healthy bodies are not likely to become very ill. But Coronavirus can be dangerous to people who are elderly or already have serious diseases.

How do we stop coronavirus spreading?

We can stop Coronavirus spreading by washing our hands often and keeping some space between ourselves and other people.

Why do I feel worried?

When we feel scared, it's our body's way of telling us we need to take extra care to protect ourselves. And there are some important things we all need to do to stay safe, like washing our hands and keeping space between other people. Feeling worried is one way our bodies remind us to do these things. So being worried is normal!

What happens if I forget?

Don't worry if you make a mistake... it's okay. It's okay if we forget to keep space between people – we can't remember everything all the time!

There have been big changes in our lives because of Coronavirus. So Coronavirus is probably making your life feel really different right now. All these changes might make you feel scared or worried. That's ok. It's totally normal to feel like this.

We've got some new things in RSVP to help keep everyone safe and help you feel less worried...

Coronavirus & Keeping You Safe in RSVP

Because of coronavirus, we've got some new things in RSVP to help stop coronavirus spreading and keep everyone here safe and well...

We have extra places where you can clean your hands

RSVP might be a bit quieter

There will be less toys and things around

You will see people wearing face masks

People will keep extra space between each other

You may see people cleaning
